

## User Guide/User Manual

### A. User Perspective

This is the Opening Screen; it is the first thing the users will see upon opening our application. The Opening Screen shows the logo for the app, the name of the app as well as the slogan of our app, "CARE THAT YOUR PET NEEDS".

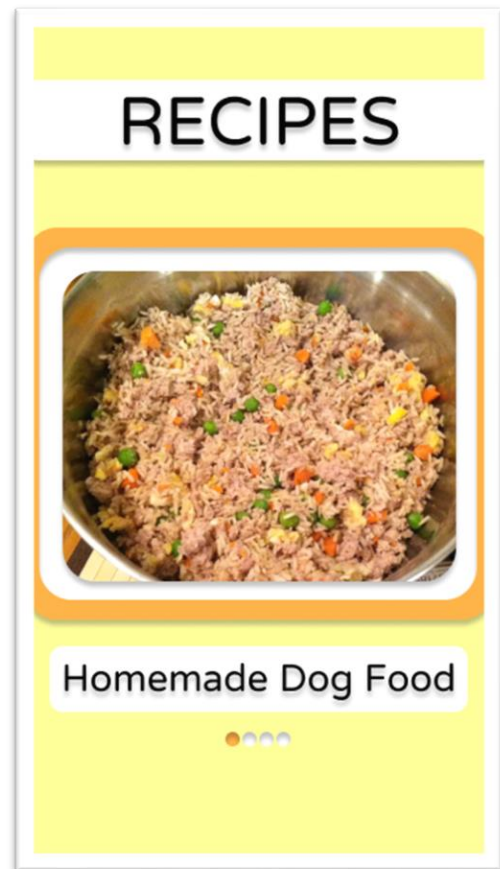

When the user clicks on the opening screen, the app will take the user to the features screen. This is where the user will find the features of our application. The user may choose which ever feature they want, these features are Recipe, Record, Symptoms, Do's & Don'ts, and lastly the Alarm feature.

When the user clicks on the Recipe button of the Recipe feature, the app presents two buttons, these buttons will take the user to the recipe on either dogs' or cats' recipe, in which also the user can choose which recipe they please to prepare for their pets.

When the user clicks on either the CAT or DOG button, the app will take the user to the RECIPES screen, where the app shows the recipes the user can prepare together with the names of each recipe for easy recognition of recipes, the user can swipe to the right to preview the next recipe they wish to prepare.

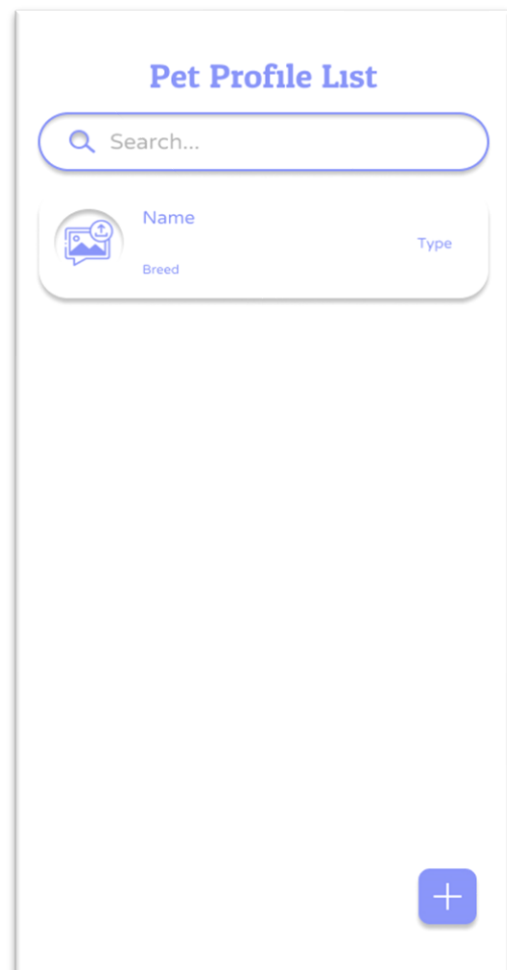

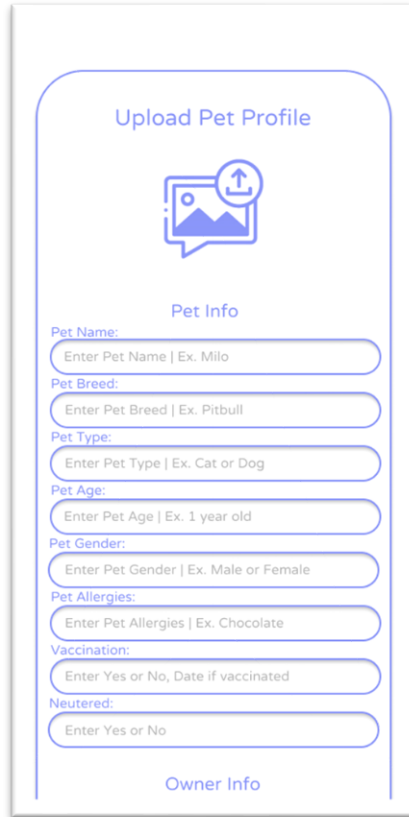

When the user chooses and clicks on the recipe they want to prepare, the app will present to the user, the ingredients, directions, and nutrition facts. To view other recipes, the user may click on the back button on their smartphones.

When the user clicks on the Record button for the Record feature, the app will take the user to the pet profile screen, where the user can search for the name of their pet/s, as indicated on the screen and view the profile of their pet/s once they click on the file.

The user can also add another Pet Profile via clicking the Add button on the bottom right of the screen.

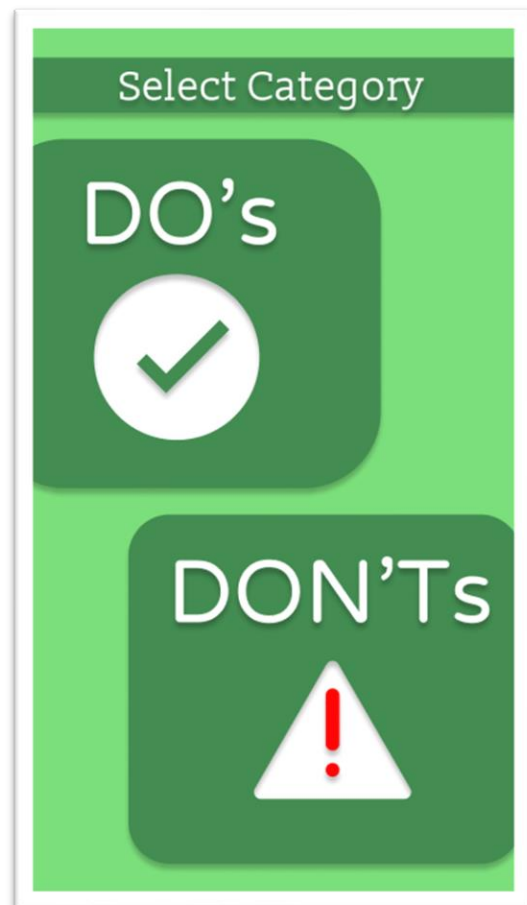

The form is titled "Upload Pet Profile" and features a blue icon of a camera with an upload arrow. Below this is a section labeled "Pet Info" containing several input fields: "Pet Name:" (placeholder: "Enter Pet Name | Ex. Milo"), "Pet Breed:" (placeholder: "Enter Pet Breed | Ex. Pitbull"), "Pet Type:" (placeholder: "Enter Pet Type | Ex. Cat or Dog"), "Pet Age:" (placeholder: "Enter Pet Age | Ex. 1 year old"), "Pet Gender:" (placeholder: "Enter Pet Gender | Ex. Male or Female"), "Pet Allergies:" (placeholder: "Enter Pet Allergies | Ex. Chocolate"), "Vaccination:" (placeholder: "Enter Yes or No, Date if vaccinated"), and "Neutered:" (placeholder: "Enter Yes or No"). At the bottom of the form is a section labeled "Owner Info".

When the user clicks on the Add button, the app will take the user to the pet profile forms screen, this is where the user may input their pet's information, add an image to keep better track of which pet already has a record, input various important details such as Allergies, Vaccination, Owner's address, and Veterinary information.

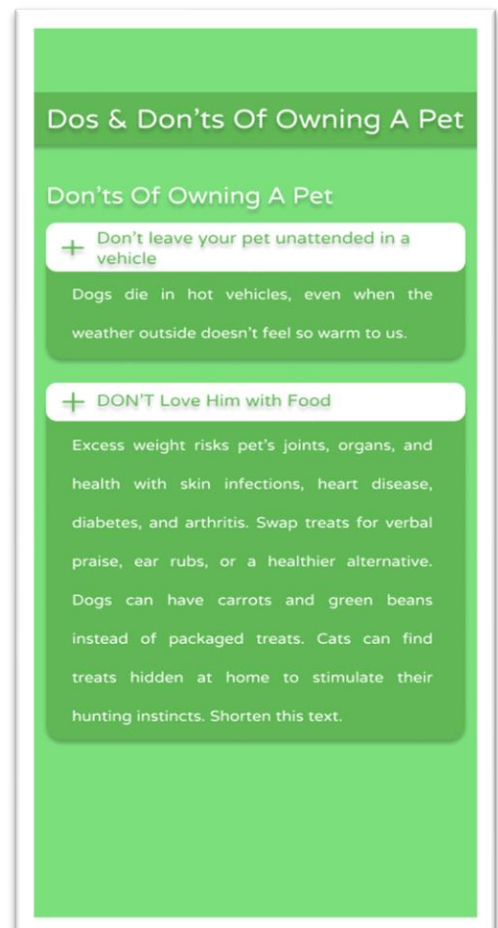

When the user clicks on the Do's & Don'ts button to view the Do's & Don'ts feature of the app, the app will present to the user a second screen of do's & don'ts button.

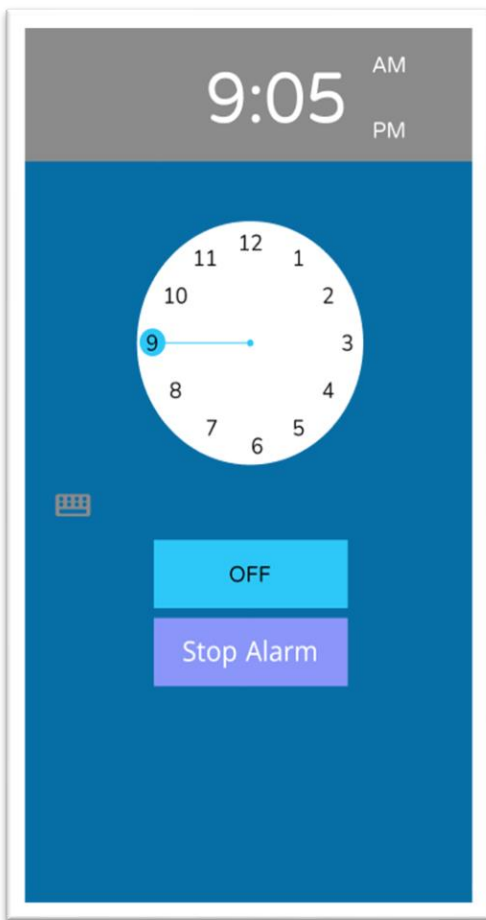

The screen has a green background and is titled "Select Category". It features two main sections: "DO's" with a green checkmark icon, and "DON'Ts" with a red exclamation mark icon inside a white triangle.

When the user clicks on either the Do's or Don'ts button, the app will present sentences or instructions for the user/s to follow.

The Alarm feature is for when the user wants to set a time for when they wish to have a veterinarian appointment or simply just set a time for when their pet needs medication or feeding time.

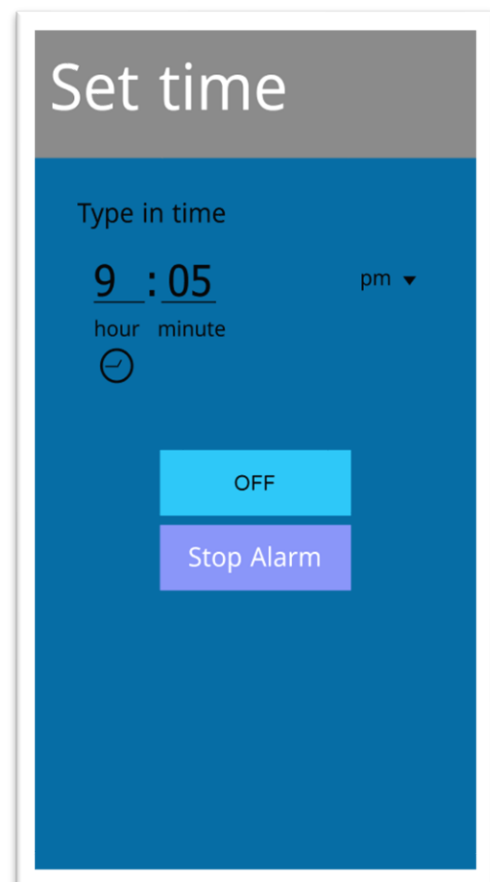

The user can set the Alarm Feature by setting the time via the clock or the keyboard icon or button on the bottom left of the clock.

If the user wishes to set the time via the keyboard button, the app will take the user to another screen where they can set the time.

The user can also set the alarm to either AM or PM.

To set the Alarm, the user can press on the Off button of the lower part of the screen and if the user changes their mind upon setting the Alarm, they can just simply press the Stop Alarm button.

The Symptoms feature shows the different common diseases a pet can have, and this feature shows the user the symptoms or indications to diseases for the user to know.
